MEMORANDUM

DATE: 4-12-90

FROM: Steve Spurlin-OSC
EPA-Region IV

TO: File

SUBJECT: Site Visit - Montreal Court Drum Site, Tucker, Georgia

At the request of Shane Hitchcock, EPA-OSC Unit Chief, I conducted a site visit on April 12, 1990 to inspect the condition of the drums. All the drums from EPA's previous site investigation on 1-10-90 were present; however, the drum marked D03 was laying on its side and appeared to have leaked a small amount of an oily substance. Also, I observed oil stained soil beside the palet where drum D03 had previously rested. The stain looked to be the result of a 3-5 gallon oil leak from drum D03.

I also observed a large forklift and a flatbed truck immediately adjacent to the area where the drums are stored.
